Panchgavya 5ml Pouch model April 25 MRP Rs.700

Backside 10 language Instructions

How to make 500ml (Dlog Technologies) Panchgavya liquid manure from 5ml Panchgavya

Processing: Items needed: 1. Cleaned, well Dried Plastic mug of 1 Litres or 800ml Capacity only. 2. A dry 5 or 5 and half inches size Stainless Steel Spoon. 3. A pair or Scissors. 4. A newly bought 500ml bottle of water. Or empty half litre pet bottle, not previously used for making this Panchgavya.

Steps: 1. Open the 500ml water bottle, pour the water into the dry mug. (Or take 500ml water in the mug, using half litre water bottle) 2. Shake the 5ml Panchgavya Pocket once, and cut open it with the help of Scissors, and pour/add the entire content into the water. 3. Stir/Mix with SS Spoon, 5 times only, as shown in the Video:

<https://youtube.com/watch?v=kgeMecOCbVQ> 4. Now Panchgavya Liquid Organic manure is ready. Pour this 500ml into the half litre Pet bottle. This can be used for further 3 years. But shake the Pet bottle once, before taking out the Contents.

Reuse of PET bottle: Never reuse the Pet bottle used for storing prepared Panchgavya Liquid Organic Manure (PGLOM)

Dated: 14 04 25

5. All types of diseases, like bacterial attack etc can be cured by Organic Nutrition route
6. 200% yield can be achieved through use of Organic nutrition route.

- By Dlog Technologies, Chennai 33.

All Chemical farmers, certainly need to spray our Panchgavya LOM manure as top spray. Why?

Fertilizers recommended by manufacturers is 8 bags (400 kgs) for 1 acre. But local dealers recommend only 4 bags (200 kgs). This is because, the sale is on credit basis, and chemical fertilizers are very costly.

Some rich farmer use even up to 16 bags (800 kgs) for 1 acre to get maximum yield.

Hence 4 bags (200 kgs) is very much below, needed quantity or nutrition of fertilizers for 1 acre. So the yield is very low for chemical farmers.

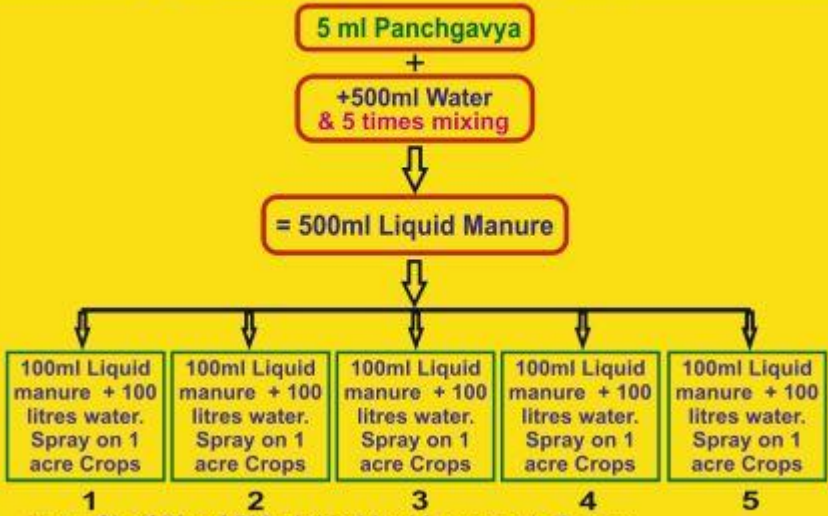

So every chemical farmer, must compulsorily give top spray to increase the yield.

All spray fertilizers or organic products are very costly. But our PG LOM is very extremely low priced product, just Rs.140 for 1 acre for 1 spray.

So every chemical farmer need our PG LOM as top spray
Hence, both organic farmers and chemical farmers need to use our PG LOM Spray to get maximum yield.

Dlog Technologies

5 ml Panchgavya can be sprayed on to crops in 5 acres as below

Note: Shelf life of 500ml this Liquid manure is 3 years
