Gopanchanga 3ml User Instructions as of 3 3 26

User Instructions: Take 15 litre water in a big empty bucket. Shake this pouch once. Cut and open this pouch in on top or in one corner, add / pour this 3ml into the 15 ltr water in the bucket. Mix by hand 3 times only. Do not mix more than 3 times. Using a well cleaned fine mist Sprayer (Ultra low volume sprayer pump, fitted with fine mist spray Nozzle), spray this 15 litres evenly in all parts of the standing field Crops in 1 full acre. The Spraying person must walk very fast across 1 acre field to cover entire field with just 15 litres. (Do not mix inside Sprayer Tank, prepare mix in open bucket only). For more yield, Spray once in 10 or 12 or 15 days. For Short trees, that grow up to 15 feet tall, spray 20~30 litres for 1 acre once in 15 or 30 days. If plants or trees are suffering from insects, pests, fungus, bacteria or viral diseases, then, spray 3 times only, once in 7 days. Even if 10%~15% of plant leaves receive the spray, it is considered enough.

For Drone spraying, mix this 3ml with 10 or 12 or 15 litres water and spray over 1 acre.

This Gaupanchagavya spray is suitable for spraying on all short term crops viz. Greens 20~30 days, Water melon or small Onion 60~65 days. Oil seeds, pulses, maize, Corn of 90 days, vegetables, paddy wheat floriculture of 120 days, and other short term crops and trees that grow up to 15 feet only.
